## NEW TRAINING COVERS TODAY'S HOTTEST TOPICS

FROM CYBERATTACKS TO SOCIAL ENGINEERING, PHISHLINE HAS YOU, YOUR EMPLOYEES AND YOUR COMPANY COVERED

When it comes to training, our philosophy is you can never have too much. With this in mind, we've developed six new phishing awareness modules available now in the Content Center Marketplace.

The modules cover a variety of

topics essential for developing security-aware employees and run from two to three minutes in length.

Each can be administered as stand-alones or with a follow-up quiz that reinforces key concepts.

### 6 NEW MODULES

- Cyberattacks
- Human Factor
- Incident Response
- Mobile Devices
- Passwords
- Social Engineering

### Enhanced user platform features card-based interface

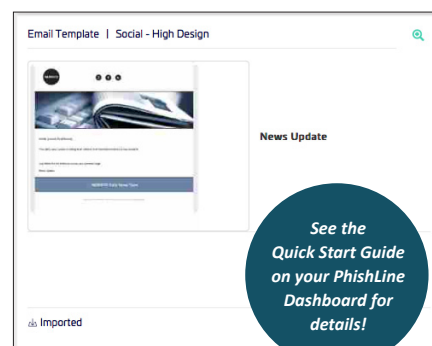

If you've downloaded a course or created a template recently, you may have noticed some changes.

Templates and courseware are now displayed in a card format

allowing you to easily view multiple attributes at a glance.

"It's really nice because it gives you a quick lay of the land that makes navigation easy," said one first-time user.

An example of the interface is pictured to the right. If you have questions about the interface, your consultant can assist you.

### Summer phishing picks up with fun-themed email templates

As temperatures rise and summer hits full swing, now is the time to make the most of PhishLine's latest batch of email templates!

From theme park passes to mini golf tournaments, we have more ways to

leverage the season to create email campaigns that help employees recognize phishing attempts and raise their security awareness.

...AND ON A MORE SERIOUS NOTE

We've also added numerous templates that look and feel like the kind of everyday emails one might expect to receive in an inbox.

A partial list of topics includes:

- Travel Insurance
- Time Off Portal
- Parking Rules
- Badge Issue
- Speed Camera
- Survey Prize Award
- Driver's License Revoked

If you have an idea for an email template or have a special request, please contact your consultant.

#### WHAT'S ON THE HORIZON?

Ransomware attacks are on the rise, and we're putting together a special module dedicated to fighting them. More to come!
