# CLICK THINKING™

Quick insights for protecting yourself and your company from online threats

## CAN YOU THINK LIKE A CYBERCRIMINAL?

To beat a cybercriminal you have to think like one. So we're giving you and your employees the chance with the Click Thinking Game, "It's Here, It's There, It's Ransomware!"

This engaging training module lets you choose your target, procure malware and select the phishing email lure you feel has the best chance of succeeding.

Will your efforts lead to total success or complete and utter failure? The only way to find out is to play! Ask your consultant for a demo today.

MALWARE PROCURED

Name: K. Oss
Cybercriminal
THIS ATTACK WAS HIGHLY SUCCESSFUL!
Play Again
Call it a Day

The Click Thinking game has multiple endings, so there's always a reason to play again!

## Network Security Module Caps Latest Round of New Training

If you haven't been to the Content Center Marketplace™ recently, here are some highlights of what's recently been added:

### Network Security
Outlines best practices to protect your company network from cybercriminals.

### Security and the Cloud
An introduction to threats when using the cloud and how to guard against them.

### Spear Phishing
Tips for recognizing spear phishing attempts and what to do if you're targeted.

NEW MODULES ARE ADDED REGULARLY—CHECK WITH YOUR CONSULTANT

NETWORK SECURITY     SECURITY AND THE CLOUD     SPEAR PHISHING

## MORE LURES THAT MIMIC EVERYDAY PHISHING EMAILS

Cyberattackers don't play by the rules when they phish. In fact, they regularly copy logos from the web to create phishing emails that look legitimate.

While Phishline refrains from these practices, we continually work to develop email templates that are convincing enough to provide a real-world training experience. Look for them in the Content Center Marketplace™

Your consultant would also be happy to show them to you.
