

Conducting a phishing simulation is easier when you have the right tools. The following tips and content will help you plan and execute your campaign your way, so you can train and inform effectively.

- Choose any email in the Barracuda PhishLine content center that you feel best targets your employees to see if they could be compromised. Link it to the 'You've Been Phished' landing page.
- Link the landing page to the Access Control module so that employees who click the link can learn more about the topic (optional).
- Use the Access Control Spotlight and Infographic to supplement training by distributing as desired.
- As always, contact Barracuda PhishLine support with questions or if you would like assistance.
