- ✓ **CT101A-6** Phishellaneous Combined

Binge-Worthy NCSA Best Practices Training Is Here

Our new best-practices videos produced by the National Cyber Security Alliance are funny, brief and full of insights to keep your organization cyber safe. The best part? You can watch all of them in less than 15 minutes!

Dave gets zapped by a malicious file in the 'Internet Downloads' training module

CONTENT CENTER

The Content Center continues to deliver more of what you need to create real phishing simulations and train employees:

- Tax time and other seasonal phishing emails.
- Emails based on real-world threats.
- Hundreds of emails featuring international brands and services from every Barracuda PhishLine market.
- Redesigned Click Thinking Spotlights covering topics, like Ransomware, Data Breaches and Catfishing.

PRODUCT UPDATES

LMS Upgrade Complete We've made several improvements to the Learning Management System to ensure even more reliable performance and training data. Enhancements include:

- Reliable tracking of course progress and completion.
- Real-time progress tracking as users answer questions.
- Ability to resume training even after closing the browser by clicking the link in the email.
- Training results with one record per student per course.

Office 365 Connector Is Live Now you can quickly and easily create an address book for testing and training by connecting to Office 365. This enhancement reduces campaign-building time significantly, so you can focus on other information security issues.

UPCOMING

Our Spring benchmarking campaign takes place in April. Watch your email for details and an invitation to find out how your organization compares to others by participating!
