Product News and Updates

NEW THIS MONTH

Cyber-Safe to the Finish

As the year winds down cyber thieves are amping up their efforts to scam businesses and employees during the holidays. To help you stay ahead in the waning days of 2022, we've put together a content bundle to protect you through the new year and beyond!

Three New Click Thinking Express Modules

Learn how to spot social engineering tactics before your next holiday get-together with our Professional Networking module. Or sniff out text and voice phishing seasonal scams with our Vishing and Smishing module. Finally, check out the Applications module before you download something 'grinchy' and malicious!

Check out the module listing in this month's bundle for these and dozens more. They're available now in the Content Center.

Quick Launch Update

Last month we highlighted our brisk progress developing Quick Launch campaigns. Since then we've added more than one hundred to the catalog and look to double this in early 2023! These streamlined campaigns reduce the effort to run phishing awareness simulations to mere keystrokes and feature localized templates for markets across the globe. Access them with the Quick Launch feature on your dashboard.

[QUICK LAUNCH](#)

Growing Quick Launch catalog includes English, Spanish, French, UK and Australian campaigns available now with German and Italian on the horizon.

CONTENT WRAP-UP

This year we introduced a number of new training aids, including Click Thinking Express modules, Click Thinking Interactive Training, new infographics, real-world threat emails and more. Content is just one component of our comprehensive approach to training that seeks to raise the security awareness bar for all of our clients:

Training and Awareness

Extensive catalog of training content tailored to different learning styles and abilities.

Testing

Multi-vector threat simulation to assess user awareness.

Review Results

Detailed reporting metrics to determine effectiveness and inform the next campaign.
