Product News and Updates

NEW THIS MONTH

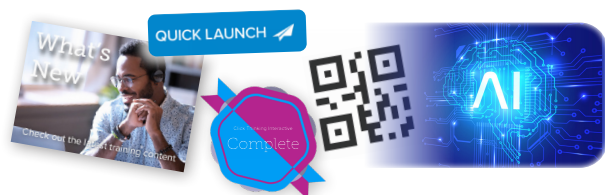

A Look Back—A Peek Forward

In a year that's gone by quickly, it's easy to forget what we've accomplished together and where we're heading. Let's review:

Interactive Milestone In 2023 we completed the Click Thinking Interactive Training catalog of 11 modules. Entertaining and educational, these hands-on courses turn everyday employees into a strong line of cyber defenders using videos, games and infographics. A handy implementation guide caps off this set.

Instant Access to New Content Our helpful 'What's New' page on Campus debuted in Spring, giving you one-click dashboard access to the latest phishing emails, training videos and tools.

Quick Launch Challenge All year we've encouraged you to try our streamlined Quick Launch feature. If you haven't, check out this [30-second clip](#) to see how simple training can be!

QR Code Security The rapid increase in QR code popularity has spawned a new generation of scammers intent on exploiting them. A QR code safety module slated for release in early 2024 covers security basics. An advanced follow-up module will highlight popular QR code scamming tactics.

Deep Fakes Fears of AI-driven deep fake scams skyrocketed in 2023 with the advent of platforms like Chat-GPT. In 2024 we'll zero in on the issues and training needed to protect you.

MANY FRONTS—ONE SOLUTION

In a world that leans toward hybrid work solutions, you can count on Barracuda Security Awareness Training to adapt. From training that's optimized for desktop and mobile to content in multiple languages, we have the tools to empower your workforce against cyberattacks wherever you do business—and we're ready to put them to work for you, whether you're protecting a mom-and-pop shop or an enterprise operation.

Check out all we have to offer in our latest module listing. If you have special requests for training or simply need assistance, don't hesitate to reach out to our knowledgeable, friendly experts in [Barracuda Support](#). We're here 24/7 and ready to help.

YEAR-END MESSAGE

We want to thank you for partnering with us this year to protect your people, data and reputation from cyber threats. Whether you're an existing client or have just signed on, our commitment to make security awareness training second nature for you remains strong—and we look forward to upholding it in the new year and beyond.
