NEW THIS YEAR

Start Strong, Stay Strong

Now is a great time to recommit to prioritizing information security. So, we're kicking off 2024 with a guide to becoming a strong advocate for cyber-safe practices within your organization and a renewed commitment to protecting you!

Educate Your Team and Yourself Knowledge is power.

Stay informed about the latest cyber threats and protect your organization with security awareness content. Our baseline training covers everything from phishing basics to incident response. Check out all our training in this month's bundle.

Know Your Resources You have an immense catalog of training videos and simulated phishing emails at your disposal in the Content Center. Visit regularly and click the What's New icon on the SAT dashboard for the latest content.

Access Help [Barracuda Support](#) is your 24/7 guide when you're stuck, have a question or need insights into using the SAT tool or incorporating content into your training strategy. Don't be afraid to reach out. [Barracuda Campus](#) is also an invaluable resource.

QR Code Animated Training

QR codes can be security risks if users fall prey to a code that scammers have manipulated. For content that trains your employees how to protect themselves, check out the new QR Code Safety animated training module and infographic in the latest Click Thinking bundle. An advanced QR code safety module is also in the works. Check out future Click Thinking newsletters for details and availability.

MAKE BENCHMARKING A HABIT

We're setting the bar high in 2024 to get all active SAT clients to participate in a [benchmarking](#) campaign! We conduct two each year, in April and October. What's in it for you? Up-to-date click rates, peer and industry comparisons, and a custom report you can share with your CEO that outlines vulnerabilities and opportunities to fortify your organization against phishing. Now that's an incentive! The best part? Benchmarking campaigns are free to all SAT clients, and we set them up for you! Make this the year you get a clear understanding of your organization's vulnerability to phishing attacks. See the upcoming March edition of Click Thinking for Spring benchmarking campaign details and sign-up information.

READY FOR THE REAL WORLD

Each year, criminals devise new ways to compromise defenses with phishing emails and social engineering scams. To stay ahead we continually develop email simulations with real-world roots to help you prepare your employees for potential attacks. Use the Real World Threats filter in the Content Center to access them all!
