

# Click Thinking Bundles

Your guide to bundled Security Awareness Training content

## Click Thinking is Just the Beginning!

When the Click Thinking newsletter arrives in your inbox it also comes with a new bundle of security awareness training that's ready to go! Here's how to access and incorporate this curated content into your training plan:

### 1 Your dashboard footer is the key

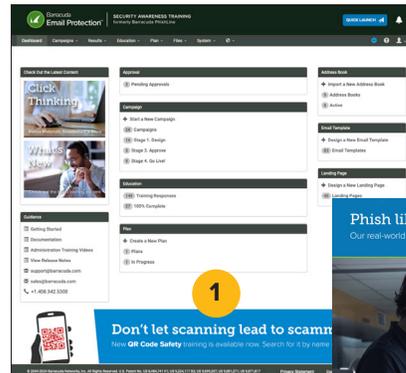

Locate the footer on the Security Awareness Training (SAT) dashboard. It highlights the focus of the latest bundle and changes when a new bundle is available (typically monthly). Click anywhere on the footer to access the bundle web page.

### 2 The bundle web page provides context

The bundle web page provides an overview of new content.

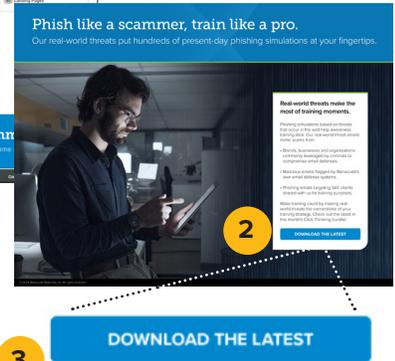

### 3 The 'download the latest' button makes it happen

Just click the button to access the latest Click Thinking Bundle!

**A typical bundle includes**

- Click Thinking newsletter
- Infographic
- The Latest Module Listing
- What's New overview
- Extra content (periodically)

## Incorporate the Click Thinking Bundle into your training

- Conduct a simulated phishing campaign using the new real-world threat emails highlighted in the What's New overview.
- Make new video training the focus of your next training campaign and use monthly bundles as a basis for your training calendar.
- Send out new infographics to support existing campaigns.
- Relate cybersecurity to current events, such as high-profile data breaches or privacy concerns, to highlight its real-world relevance.
- Use Content Center search filters to locate emails and landing pages that relate to bundled content.

## Access all Click Thinking Bundles

Want to access more than just the latest Click Thinking Bundle? The convenient Click Thinking icon on the SAT dashboard puts dozens of bundles at your fingertips!

The Training Resources and module listing that's included with every bundle also includes a comprehensive list of Click Thinking Bundle topics
