## Product News and Updates

### NEW THIS MONTH

#### Keeping It Flexible

The work landscape has gotten far more flexible in recent years, and the upcoming summer months will only add to it. To help you and your employees navigate this territory we've put together a Flexible Work lifestyle bundle that covers essential security topics, like working from home, bringing your own device and more. From training modules to infographics, we've got everything you need to make the most of the changing workplace!

#### Summer Blockbuster Season is Here!

A-list stars, such as Michael B. Jordan and Tessa Thompson, make our live-actor training modules a must-see this summer. Fresh, funny and informative, these highly produced vignettes take information security to Summer blockbuster levels. Find them in the Content Center training section using the search term 'NCSA' in the name filter.

#### Take Information Security With You This Summer

It's human nature for employees to put information security on the back burner when vacationing. But while they're letting their guard down, cyber thieves and social engineers are gearing up. Resorts, airports, cruise ships and even theme parks can be hotbeds for scam artists, shoulder surfers and public wifi stalkers.

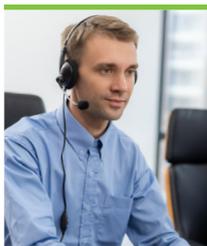

Don't let them get the best of your employees or your organization! Our *Travel and Out of Office* and *Social Engineering* training modules address key security topics for people on the move. From road-trippers to world travelers, we've got it covered.

#### Click Thinking Interactive Training Perfect for Summer

Simplify your summer with Click Thinking Interactive Training that deploys a robust mix of videos, games, infographics and quizzes at the touch of a button! These comprehensive modules cover key information security concepts in a fun and engaging way. Choose from a wide variety of titles available now in the Content Center. Highlighted titles are perfect for Summer—just search them by name in the Content Center training section.
