### Instagram Connections Reduction

**Instagram is changing the way you connect.**

While Instagram values connections more than anything, we also understand that some last longer than others. In an effort to support connections that mean the most to our community, we are launching a campaign to optimize your connections list by limiting the number of friends you can interact with to 200.

**What this means to you.**

Beginning today we will evaluate connections lists for inactivity. Those you haven't messaged, liked or interacted with for the past six months will be marked for deactivation. You will have an opportunity to approve or deny any deactivations, however, and you can check your list at the link below.

**Check which connections will be deactivated**

We invite you to work with us as we implement this new feature. Please feel free to share your thoughts in our [connections forum](#), where feedback will be used to refine our efforts. Thank you for being a valuable part of our community.

### CFO Leak

Hey {email:firstName},

This landed in my inbox and I'm pretty sure it's not intended for me. It's a doc from the CFO on financials, blah, blah, blah, but some of the numbers are freaking me out. Have a look and let me know if you can make sense of it.

### AI Policy Update

Team,

Artificial Intelligence (AI) is a growing field that many of our associates have been inquiring about. In response, we have developed some guidelines for using AI to facilitate our jobs. The document enclosed at the link provided [here](#) covers acceptable applications for AI, including:

- HR and Benefits
- Compensation
- Hiring and Staffing
- External Marking and [Communication](#)
- Accounting
- Compliance

Please review the policy and confirm your acceptance at your earliest convenience. Questions? Direct them to your supervisor. Thank you.

### Amazon Delivery Query

**Hi.**

Your package has been delivered!

**How was your delivery?**

 It was great
  Not so great

Order #  
**111-4405709-7820213**

[Track your package](#)

Return or replace items in [Your Orders](#).

## Lifestyle Bundle: Flexible Work Arrangements

A guide to training content that focuses on flexible work arrangement information security safety. Available in the May 2024 Click Thinking

Lifestyle Bundle

### Lifestyle Bundle: FlexWork

Training content for everyday living you can implement with ease.

#### Managing Risk in a FlexWork Environment

Flexible work location arrangements introduce a range of cybersecurity risks that organizations must address to protect sensitive data and maintain operational integrity. As employees access corporate networks from diverse locations and devices, the attack surface for cyber threats has expanded significantly.

Employees working from home may rely on personal Wi-Fi networks that lack robust security measures, making them vulnerable to cyberattacks. Personal devices used for work purposes may not have the same level of security controls as corporate-managed devices, increasing the risk of malware infections and data breaches.

The increase in email and messaging communication has led to a surge in phishing attacks, as cybercriminals exploit remote work scenarios to trick employees into divulging sensitive information. In addition, the risk of accidental or intentional data leakage is heightened when employees handle sensitive information outside the controlled office environment. Finally, inadequate authentication mechanisms can lead to unauthorized access to corporate resources, particularly if employees reuse passwords across multiple accounts.

To offset these risks, encourage employees to use strong, unique passwords for their home Wi-Fi networks and enable WPA3 encryption. Ensure that all remote access to corporate networks is conducted through a virtual private network (VPN) to encrypt data transmission.

Implement endpoint protection solutions on all devices used for work, including anti-malware and firewall software. Require MFA for accessing corporate resources to add an extra layer of security beyond passwords. Finally, conduct regular cybersecurity training for employees to recognize and respond to phishing attempts and other cyber threats effectively.

#### Build Your Own FlexWork Bundle

The modules below address a wide range of information security issues associated with flexible work location arrangements. Available in the Content Center now, just search them by number to make security awareness top of mind.

##### Working From Home A103A-6

Tips to help protect your company from cyberthreats when working at home.

##### Bring Your Own Device A103A-2

An introduction to the risks of using one device for personal and business use.

##### Professional Networking A103A-1

Tips for protecting yourself and company when networking with professionals beyond the office.
