AT&T Copyright Strike Warning

AT&T

Dear (email:firstName),

We are reaching out to inform you that your AT&T internet service has been associated with a potential copyright infringement. According to a notice we received from a content rights holder, copyrighted material may have been accessed, downloaded, or distributed without proper authorization through your IP address.

This notice represents a copyright strike under AT&T's Copyright Alert Policy. This violation could lead to further action, including bandwidth reduction or temporary suspension of service.

To view the details of the alleged infringement and next steps, please visit the link below:

Dan Remick
 Strategic Programs - Talent & Growth

Hi (email:firstName), I came across your profile and was impressed by your background. Your experience looks like a strong match for a role I'm currently hiring for.

I'd love to set up a quick time to discuss further and see if it might be a good fit on both sides.

Let me know if you're open to chatting.

Remote Work Dress Code

To: All Employees
 From: Human Resources
 Re: Remote Work Dress Code

Dear Team,

As we continue to adapt to a remote work environment, we have received valuable feedback from both internal and external sources regarding our professional appearance during virtual meetings and interactions.

To maintain a positive and professional image that reflects our company values, we are implementing a new remote work dress code effective immediately.

Dress Code Guidelines

- Professional Attire:** Please wear business casual clothing during work hours. This includes collared shirts, blouses, and appropriate pants or skirts.
- Avoid Informal Items:** We kindly ask that you refrain from wearing sleeveless shirts, jerseys, baseball caps, and other overly casual attire during work hours.
- Virtual Meetings:** For video calls, please ensure your attire aligns with our professional standards, as this helps us present ourselves effectively to clients and colleagues.

We understand that comfort is important while working from home, and we encourage you to find a balance that allows you to feel at ease while also representing our company professionally.

Please indicate you have read and acknowledge this policy by clicking the link below.

If you have questions about the policy or need clarification on any policy guidelines, please direct them to the HR mailbox [here](#) and an associate will get back to you.

Thank you all for your cooperation and continued efforts to create a professional work environment.

AI and the Internet of Things A103A-34

Explores the link between internet enabled devices and potential security risks.

AI and the Internet of Things Infographic

AI and the Internet of Things (IoT)
How internet-enabled devices can introduce information security risks and how to protect them.

As AI technology becomes increasingly integrated into everyday work environments, it's crucial to understand the associated risks.

While these IoT devices enhance productivity and streamline operations, they also introduce new vulnerabilities that malicious actors can exploit.

A compromised smart printer could become an entry point into the company's network, potentially allowing unauthorized access to sensitive information.

Hackers can manipulate AI algorithms, which could lead to data breaches or even disrupt business operations.

So, how can you help mitigate these risks? Here are some important steps to follow:

**So, how can you help mitigate these risks?
Here are some important steps to follow:**

- Ensure that all smart devices you use are regularly updated with the latest security patches.
- Implement strong, unique passwords for your accounts and devices, and enable multi-factor authentication wherever possible.
- Be proactive in participating in regular security audits to help identify and address potential vulnerabilities.
- Equally important is fostering a culture of security awareness.

Regular training sessions can help you recognize and respond to potential threats, ensuring everyone plays a vital role in safeguarding data, networks and the organization from threats to IoT devices.
